

Subscribe To Open

Subscribe to Open is the new business model of EMS Press for fair and sustainable Open Access publishing.

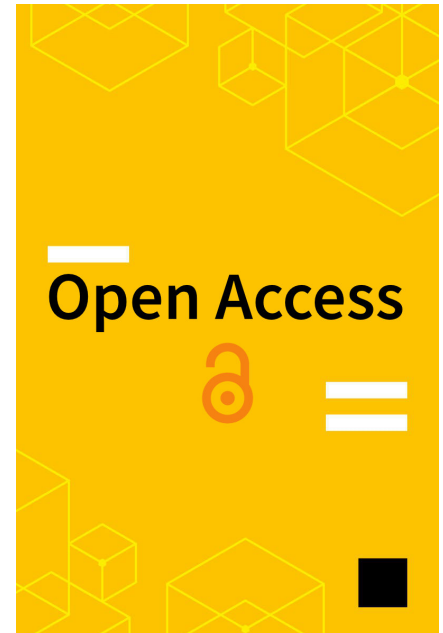

2021 Programme Results

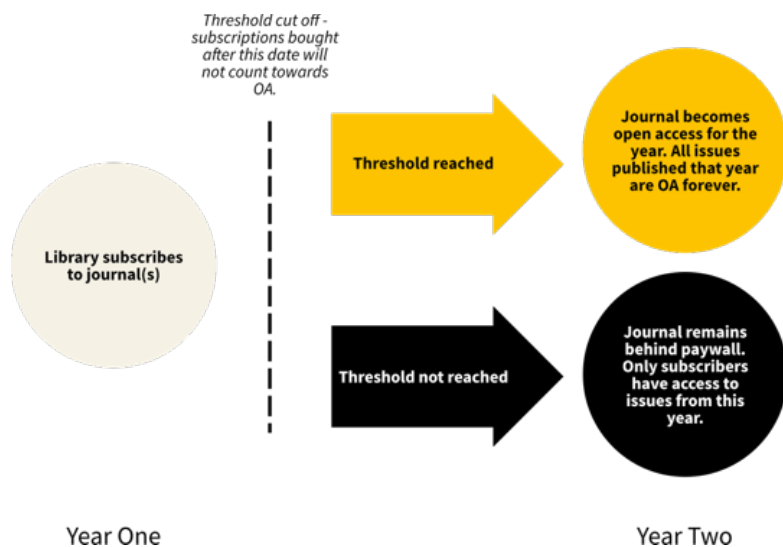

We are pleased to announce that we have successfully converted all 10 of our S2O journals programme to open access for the whole of 2021. Further details can be found [here](#). We have now launched our 2022 round with 17 titles from our portfolio - the complete list can be found below.

Overview

EMS Press has made the decision to transition its portfolio of journal titles to Open Access. In making this decision, it was agreed that the society could not support a model that may present barriers to publication, and as such any model relying on APCs would not be suitable. Through rigorous analysis of the various remaining options available to the Press, we have elected to pursue a Subscribe to Open (S2O) business model.

Transformative agreements, including Subscribe to Open pioneered by Annual Reviews, emerged as the most promising. — SPA-OPS Report, 2019

S2O is a sustainable and equitable model for open access. Libraries continue to subscribe to journals for the coming year, as they always have (with the usual subscriber benefits, such as archive access). At the end of the current year if a journal has achieved the target set by the Press then that journal becomes open access - if not then it remains behind a paywall and only subscribers have access. Where there is a funder requirement for open access EMS Press will publish articles under Green Open Access, ensuring that the article is freely available regardless of the overall journal status.

The only way to guarantee access to any of the Press's journals is to subscribe, and doing so has the added effect of flipping titles to open access once a threshold is achieved, benefitting the whole mathematics research community.

Open access content provided through our Subscribe To Open (S2O) programme is done so under the [CC-BY 4.0 license](#). Please view our [Terms of Digital Access](#) for our repository policy.

S2O has clear benefits for all participants in the publishing ecosystem.

For the subject librarian

- Retain control of budgets and collection;
- Administratively, subscriptions operate as before but now support OA;
- Guaranteed access to journal content when subscribing (including full archive), regardless of outcome.

For the researcher

- No APCs or other financial barriers to publication;
- Publish where you choose, not where your institution has a deal;
- Support an equitable system for all researchers based on relevance and quality, not cost.

For the publisher

- Streamlined administrative processes, reducing internal costs allowing focus to be on content;
- Support OA in a truly sustainable way;
- Support global equity in scholarly publishing.

Journals included in EMS Press's 2022 S2O Programme are:

- Annales de l'Institut Henri Poincaré C (AIHPC)
Webpage coming soon
- [Annales de l'Institut Henri Poincaré D \(AIHPD\)](#)
- [Commentarii Mathematica Helvetici \(CMH\)](#)
- [Elemente der Mathematik \(EM\)](#)
- [EMS Surveys in Mathematical Sciences \(EMSS\)](#)
- [Groups, Geometry, and Dynamics \(GGD\)](#)
- [Interfaces and Free Boundaries \(IFB\)](#)
- [Journal of Combinatorial Algebra \(JCA\)](#)
- [Journal of the European Mathematical Society \(JEMS\)](#)
- [Journal of Fractal Geometry \(JFG\)](#)

- [Journal of Noncommutative Geometry \(JNCG\)](#)
- [Journal of Spectral Theory \(JST\)](#)
- [Mathematical Statistics and Learning \(MSL\)](#)
- [Memoirs of the European Mathematical Society \(MEMS\)](#)
- [Portugaliae Mathematica \(PM\)](#)
- [Quantum Topology \(QT\)](#)
- [Revista Matemática Iberoamericana \(RMI\)](#)
